STA Installation Instructions for a Rear Load Changer

1. Unplug the power cord or remove all power from the system at the circuit breaker.
2. Remove the existing stacker and validator.
3. Remove the validator bracket from the mounting studs located on the front wall of the cabinet. Disconnect the heater pad (if present) and remove it as well.
4. Secure the new validator mounting bracket assembly (37-0055B) to the studs on the front wall of the cabinet using four 1/4-20 nuts.
5. Secure the adhesive backed foam seal to the inside of the cabinet front around the validator opening.
6. Connect the small end of the 9-pin harness adapter to the STA validator and the other end to the system harness.
7. Slide the validator into the validator bracket from the rear.
8. Connect the stacker harness and hang the stacker from the back of the validator mounting bracket.
