Top Load Counter

Standard's NEW Modular Series MINI were designed for "simple function" coin or token exchange. The MINI Series features a small cabinet that can be used in countertop, wall-mounted or machine-mounted applications. The unique cabinet design allows easy access to the hopper and bill acceptor for maintenance or replenishment operations. The optional features are limited due to the small cabinet. This is an ideal changer for small vending and amusement operations where security is not an issue. Great for changing Canadian Loonies & Toonies into quarters or tokens.

The MCM100-CA Changers feature:

- Front Load with Top Lid configuration for Change or Tokens
- (1) Electronic Coin Acceptor - programmed for U.S. and Canadian Coins
- (1) Modular MINI Smart Hopper - holds 1,600 Qtrs. (\$400 capacity)
- Steel cabinet with solid welded seams, top lid & front face open for easy access
- Simple Cam Lock (Optional T-handle Lock with Ace plug available)
- High gloss powder-coated enamel paint finish with applied Lexan™ graphics
- Two Year Limited Warranty & ETL Certified in accordance with UL & CSA standards.

Height	Width	Depth	Shipping Weight	Changes
10.75	13.625	13.313	40 lbs.	/\$0.10 / \$0.25 / \$0.50 / \$1
